## Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis)

This book presents both theoretical contributions and empirical applications of advanced statistical techniques including geo-additive models that link individual measures with area variables to account for spatial correlation; multilevel models that address the issue of clustering within family and household; multi-process models that account for interdependencies over life-course events and non-random utilization of health services; and flexible parametric alternatives to existing intensity models. These analytical techniques are illustrated mainly through modeling maternal and child health in the African context, using data from demographic and health surveys.

In the past, the estimation of levels, trends and differentials in demographic and health outcomes in developing countries was heavily reliant on indirect methods that were devised to suit limited or deficient data. In recent decades, world-wide surveys like the World Fertility Survey and its successor, the Demographic and Health Survey have played an important role in filling the gap in survey data from developing countries. Such modern demographic and health surveys enable investigators to make in-depth analyses that guide policy intervention strategies, and such analyses require the modern and advanced statistical techniques covered in this book.

The text is ideally suited for academics, professionals, and decision makers in the social and health sciences, as well as others with an interest in statistical modelling, demographic and health surveys. Scientists and students in applied statistics, epidemiology, medicine, social and behavioural sciences will find it of value.

### **From reader reviews:**

#### **Marcia Fullerton:**

Have you spare time for a day? What do you do when you have a lot more or little spare time? Sure, you can choose the suitable activity for spend your time. Any person spent their own spare time to take a stroll, shopping, or went to often the Mall. How about open as well as read a book called Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis)? Maybe it is to become best activity for you. You realize beside you can spend your time along with your favorite's book, you can wiser than before. Do you agree with it has the opinion or you have other opinion?

#### **Nancy Smith:**

Are you kind of busy person, only have 10 as well as 15 minute in your time to upgrading your mind expertise or thinking skill possibly analytical thinking? Then you have problem with the book as compared to can satisfy your short period of time to read it because all this time you only find publication that need more time to be examine. Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis) can be your answer given it can be read by an individual who have those short spare time problems.

#### **Helen Leduc:**

Reading a book for being new life style in this year; every people loves to learn a book. When you examine a book you can get a lots of benefit. When you read ebooks, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what forms of book that you have read. If you need to get information about your examine, you can read education books, but if you act like you want to entertain yourself read a fiction books, this sort of us novel, comics, along with soon. The Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis) will give you a new experience in reading a book.

#### **Bill Flores:**

In this age globalization it is important to someone to receive information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of recommendations to get information example: internet, magazine, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. Often the book that recommended to you personally is Advanced Techniques for Modelling Maternal and Child Health in Africa: 34 (The Springer Series on Demographic Methods and Population Analysis) this e-book consist a lot of the information with the condition of this world now. This kind of book was represented how do the world has grown up. The dialect styles that writer use for explain it is easy to understand. Typically the writer made some investigation when he makes this book. Honestly, that is why this book ideal all of you.
