Applied Linear Models with SAS

Daniel Zelterman

Applied Linear Models with SAS Daniel Zelterman

This textbook for a second course in basic statistics for undergraduates or first-year graduate students introduces linear regression models and describes other linear models including Poisson regression, logistic regression, proportional hazards regression, and nonparametric regression. Numerous examples drawn from the news and current events with an emphasis on health issues illustrate these concepts. Assuming only a pre-calculus background, the author keeps equations to a minimum and demonstrates all computations using SAS. Most of the programs and output are displayed in a self-contained way, with an emphasis on the interpretation of the output in terms of how it relates to the motivating example. Plenty of exercises conclude every chapter. All of the datasets and SAS programs are available from the book's website, along with other ancillary material.

From reader reviews:

Daisy Richardson:

Why don't make it to be your habit? Right now, try to ready your time to do the important act, like looking for your favorite book and reading a publication. Beside you can solve your condition; you can add your knowledge by the guide entitled Applied Linear Models with SAS. Try to make the book Applied Linear Models with SAS as your friend. It means that it can for being your friend when you sense alone and beside regarding course make you smarter than in the past. Yeah, it is very fortunated in your case. The book makes you more confidence because you can know everything by the book. So , we should make new experience in addition to knowledge with this book.

Margarito Rone:

As people who live in the actual modest era should be up-date about what going on or info even knowledge to make these individuals keep up with the era which is always change and progress. Some of you maybe will update themselves by reading through books. It is a good choice for you personally but the problems coming to you is you don't know what one you should start with. This Applied Linear Models with SAS is our recommendation to help you keep up with the world. Why, as this book serves what you want and want in this era.

Paul Hardy:

As a student exactly feel bored for you to reading. If their teacher questioned them to go to the library in order to make summary for some reserve, they are complained. Just minor students that has reading's heart or real their hobby. They just do what the professor want, like asked to the library. They go to there but nothing reading critically. Any students feel that reading is not important, boring along with can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Applied Linear Models with SAS can make you truly feel more interested to read.

Randy Caldera:

What is your hobby? Have you heard that will question when you got scholars? We believe that that query was given by teacher with their students. Many kinds of hobby, Every person has different hobby. And also you know that little person such as reading or as reading through become their hobby. You need to know that reading is very important and book as to be the thing. Book is important thing to add you knowledge, except your current teacher or lecturer. You find good news or update concerning something by book. Numerous books that can you choose to use be your object. One of them is niagra Applied Linear Models with SAS.
