Foliations on Riemannian Manifolds and Submanifolds Vladimir Rovenski

This monograph is based on the author's results on the Riemannian geometry of foliations with nonnegative mixed curvature and on the geometry of submanifolds with generators (rulings) in a Riemannian space of nonnegative curvature. The main idea is that such foliated (sub) manifolds can be decomposed when the dimension of the leaves (generators) is large. The methods of investigation are mostly synthetic. The work is divided into two parts, consisting of seven chapters and three appendices. Appendix A was written jointly with V. Toponogov. Part 1 is devoted to the Riemannian geometry of foliations. In the first few sections of Chapter I we give a survey of the basic results on foliated smooth manifolds (Sections 1.1-1.3), and finish in Section 1.4 with a discussion of the key problem of this work: the role of Riemannian curvature in the study of foliations on manifolds and submanifolds.

From reader reviews:

Lauren Graves:

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to find out everything in the world. Each guide has different aim or even goal; it means that publication has different type. Some people sense enjoy to spend their time to read a book. They are really reading whatever they have because their hobby is usually reading a book. Why not the person who don't like looking at a book? Sometime, man or woman feel need book after they found difficult problem or even exercise. Well, probably you will want this Foliations on Riemannian Manifolds and Submanifolds.

Cedric Baker:

Now a day individuals who Living in the era where everything reachable by match the internet and the resources included can be true or not involve people to be aware of each details they get. How many people to be smart in getting any information nowadays? Of course the answer then is reading a book. Examining a book can help persons out of this uncertainty Information specially this Foliations on Riemannian Manifolds and Submanifolds book because this book offers you rich information and knowledge. Of course the data in this book hundred % guarantees there is no doubt in it as you know.

Lucas Florio:

In this age globalization it is important to someone to receive information. The information will make a professional understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of recommendations to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. The book that recommended to you is Foliations on Riemannian Manifolds and Submanifolds this book consist a lot of the information from the condition of this world now. This kind of book was represented how do the world has grown up. The language styles that writer use for explain it is easy to understand. The particular writer made some research when he makes this book. Honestly, that is why this book acceptable all of you.

Bess Malloy:

What is your hobby? Have you heard in which question when you got students? We believe that that issue was given by teacher on their students. Many kinds of hobby, Every person has different hobby. So you know that little person just like reading or as examining become their hobby. You should know that reading is very important in addition to book as to be the point. Book is important thing to include you knowledge, except your teacher or lecturer. You see good news or update in relation to something by book. Many kinds of books that can you go onto be your object. One of them are these claims Foliations on Riemannian Manifolds and Submanifolds.
