Marshall's Evolutionary Economics (Routledge Studies in the History of Economics) Tiziano Raffaelli

Alfred Marshall was one of the most important economists ever to have lived. This excellent new book, from a Marshall expert respected the world over, attempts to show that Marshall anticipated some of the views that are now associated with the cognitive sciences.

Examining Marshall's philosophy of the human mind, his overall approach to economics, his concern for socio-economic issues, and the fertility of his framework, this book breathes fresh life into the fascinating world of Marshallian economics.
