## **Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences)**

This book examines old and new data on some of the 18th and 19th century earthquakes that either occurred or were clearly felt in southern regions of Poland. Particular emphasis is put on a detailed study and reinterpretation of the unusually severe Outer Western Carpathians earthquake on December 3, 1786 (7 IO, 5.3 Mw, 35 km depth), which was the last in a series of seismic events in the years 1785 and 1786. An assessment is also made of what we presently know about the seismicity of the Western Carpathians in Poland based on to instrumental data. The book also presents material relating to earthquakes of 6-9 IO that affected south Poland and the surrounding regions: Žilina in Slovakia (1858), Gera in Thuringia (1872), the Sudetes on the Czech-Polish border (1883, 1901), and Lower Silesia, Poland (1895). These are analyzed and illustrated by 17 contemporary macroseismic intensity maps, some of which are considered to be remarkable for those times. A new seismic catalog for Poland is provided with amendments and updates up to the end of 2014. Noteworthy is the data on two unforeseen events: one about 60 km NE of the Polish border in 2004 and one in central Poland in 2012. It shows how important it is, not least for practical engineering purposes, to perform seismic monitoring even in seemingly aseismic regions.

**From reader reviews:**

**Jeffrey Brown:**

Reading a publication can be one of a lot of activity that everyone in the world really likes. Do you like reading book thus. There are a lot of reasons why people like it. First reading a guide will give you a lot of new data. When you read a guide you will get new information due to the fact book is one of numerous ways to share the information or maybe their idea. Second, looking at a book will make an individual more imaginative. When you reading a book especially fiction book the author will bring you to definitely imagine the story how the people do it anything. Third, you may share your knowledge to other people. When you read this Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences), you could tells your family, friends in addition to soon about yours publication. Your knowledge can inspire the mediocre, make them reading a e-book.

**Carol Hughes:**

Reading can called head hangout, why? Because if you find yourself reading a book specially book entitled Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences) the mind will drift away trough every dimension, wandering in each aspect that maybe unknown for but surely can become your mind friends. Imaging every word written in a publication then become one form conclusion and explanation that will maybe you never get previous to. The Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences) giving you a different experience more than blown away your mind but also giving you useful information for your better life in this era. So now let us present to you the relaxing pattern here is your body and mind is going to be pleased when you are finished looking at it, like winning a casino game. Do you want to try this extraordinary wasting spare time activity?

**Edward Payne:**

Is it you actually who having spare time in that case spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something new? This Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences) can be the reply, oh how comes? A book you know. You are and so out of date, spending your time by reading in this fresh era is common not a geek activity. So what these guides have than the others?

**Stephen Wilson:**

Don't be worry if you are afraid that this book will certainly filled the space in your house, you can have it in

e-book approach, more simple and reachable. This particular Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences) can give you a lot of friends because by you looking at this one book you have thing that they don't and make you more like an interesting person. This particular book can be one of a step for you to get success. This book offer you information that possibly your friend doesn't recognize, by knowing more than various other make you to be great persons. So , why hesitate? We should have Studies of Historical Earthquakes in Southern Poland: Outer Western Carpathian Earthquake of December 3, 1786, and First Macroseismic Maps in 1858-1901 (GeoPlanet: Earth and Planetary Sciences).
