Chemical Librarianship: Challenges and Opportunities Arleen N Somerville

As early as the 18th century, chemists' emphasis on up-to-date literature presented research librarians with many challenges. But now, *Chemical Librarianship: Challenges and Opportunities* will show you how you can adapt your methods to the rapidly evolving demands of twentieth-century chemical researchers without sacrificing your high standards of service. Altogether, this comprehensive overview helps you see the major role librarians still play in information education and gives you a broad assortment of strategies for coping with the accelerated demands of today's shifting electronic research environment. In *Chemical Librarianship*, you'll read about the revolutionary pedagogical experiments of librarians, teachers, computer specialists, and graduate students. You'll see how those experiments have altered the way they approach research--for the better--and how you can make positive adjustments in your own successful formulae. Individual chapters discuss:

- librarians as teachers
 - the pros and cons of integrating/separating chemical information courses
 - faculty and computing staff--partnership at the University of Florida
 - Yale University's experiment with The Electronic Seminar System
 - the evolution of electronic journals
 - the most recent trends in academic serial collection
- Take 100 mg of quickly changing research technology, a drop of increased enrollment, and 250 cc's of faculty requests, shake it up in an Erlenmeyer flask, heat it at 200 degrees Celsius, and what do you get? An explosion? A disaster? If these are your fears, put them away. Open up *Chemical Librarianship* and let some of the most informed experts on research and technology help you and your staff find just the right chemistry.

From reader reviews:

Bill Bobby:

Reading a book tends to be new life style on this era globalization. With reading you can get a lot of information that could give you benefit in your life. With book everyone in this world can certainly share their idea. Ebooks can also inspire a lot of people. A great deal of author can inspire their reader with their story or maybe their experience. Not only the story that share in the publications. But also they write about the ability about something that you need example of this. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors on this planet always try to improve their skill in writing, they also doing some research before they write to their book. One of them is this Chemical Librarianship: Challenges and Opportunities.

Calvin Williams:

You could spend your free time to study this book this e-book. This Chemical Librarianship: Challenges and Opportunities is simple to create you can read it in the recreation area, in the beach, train as well as soon. If you did not have got much space to bring often the printed book, you can buy typically the e-book. It is make you much easier to read it. You can save the actual book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.

Larry Boggs:

Is it anyone who having spare time subsequently spend it whole day by means of watching television programs or just lying down on the bed? Do you need something new? This Chemical Librarianship: Challenges and Opportunities can be the response, oh how comes? The new book you know. You are so out of date, spending your spare time by reading in this new era is common not a nerd activity. So what these publications have than the others?

John Kirk:

A lot of book has printed but it differs from the others. You can get it by net on social media. You can choose the top book for you, science, comedy, novel, or whatever through searching from it. It is named of book Chemical Librarianship: Challenges and Opportunities. You'll be able to your knowledge by it. Without departing the printed book, it might add your knowledge and make you happier to read. It is most significant that, you must aware about book. It can bring you from one location to other place.
