Information Practice in Science and Technology: Evolving Challenges and New Directions Mary Schlembach

Examine the vital issues facing sci-tech libraries in today's economic and technological climate!

This book addresses current challenges and changes in science and technology libraries—and shows how librarians are handling them in difficult financial times. It examines issues related to closing and merging libraries, online collections maintenance and costs, assistance/outreach geared toward specific groups of library patrons, and the gathering of usage statistics in the electronic environment. You'll also find specific descriptions—and a general overview—of new technologies and case studies of the impact of new technologies on sci-tech library management. Handy tables and figures make the information easy to access and understand.

Presenting a wide variety of problems and solutions, *Information Practice in Science and Technology* will help you understand the needs of users regarding current information technologies and how to meet them. From the editor: “Among the critical challenges facing sci-tech libraries (and actually all libraries) are the need to perform detailed collection assessment and evaluation, particularly in regard to e-resource collections; the need to examine and provide appropriate public services; and the need to develop strategies for the adoption of new information technologies. This book addresses these key issues and attempts to provide both perspective and insight into these problems.”

Information Practice in Science and Technology examines:

- how merging academic departmental libraries can both improve services and smooth the transition to increased use of digital information
- the process of developing, managing, and providing access to an electronic collection—a case study from the University of Notre Dame, with special attention paid to licensing and publisher agreements
- how a limited Web interface can be enhanced and become a digital portal to a library's print collection—a case study from the Grainger Engineering Library at the University of Illinois
- how libraries can support academic faculty research in cross-disciplinary subject areas
- how to address the specialized subject area information needs of meteorologists and geologists
- outreach methods that the University of California uses to better connect with library patrons and demonstrate the services that the library offers
- Digital Object Identifiers (DOIs)—the new technology for archiving and linking electronic information
- how to gather and benefit from usage statistics, with attention to electronic databases, statistics gathered from public library terminals, and transaction log usage statistics for electronic reserves
- the proposals to provide all government documents through an electronic distribution system—and what that will mean to sci-tech libraries

From reader reviews:

Tina Olsen:

This Information Practice in Science and Technology: Evolving Challenges and New Directions book is just not ordinary book, you have it then the world is in your hands. The benefit you have by reading this book is information inside this reserve incredible fresh, you will get facts which is getting deeper anyone read a lot of information you will get. That Information Practice in Science and Technology: Evolving Challenges and New Directions without we comprehend teach the one who reading through it become critical in pondering and analyzing. Don't end up being worry Information Practice in Science and Technology: Evolving Challenges and New Directions can bring once you are and not make your tote space or bookshelves' become full because you can have it inside your lovely laptop even cell phone. This Information Practice in Science and Technology: Evolving Challenges and New Directions having very good arrangement in word and also layout, so you will not feel uninterested in reading.

Aimee Nguyen:

Reading a reserve tends to be new life style with this era globalization. With looking at you can get a lot of information which will give you benefit in your life. Using book everyone in this world can easily share their idea. Publications can also inspire a lot of people. Plenty of author can inspire their very own reader with their story or perhaps their experience. Not only the story that share in the books. But also they write about the ability about something that you need example of this. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors in this world always try to improve their ability in writing, they also doing some study before they write with their book. One of them is this Information Practice in Science and Technology: Evolving Challenges and New Directions.

Lisa Chaffee:

Playing with family in a very park, coming to see the ocean world or hanging out with buddies is thing that usually you have done when you have spare time, in that case why you don't try point that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition associated with. Even you love Information Practice in Science and Technology: Evolving Challenges and New Directions, you could enjoy both. It is fine combination right, you still desire to miss it? What kind of hang-out type is it? Oh can happen its mind hangout folks. What? Still don't have it, oh come on its known as reading friends.

Marcia Marshall:

Do you have something that you want such as book? The book lovers usually prefer to decide on book like comic, small story and the biggest one is novel. Now, why not seeking Information Practice in Science and Technology: Evolving Challenges and New Directions that give your enjoyment preference will be satisfied through reading this book. Reading habit all over the world can be said as the method for people to know

world considerably better than how they react toward the world. It can't be stated constantly that reading behavior only for the geeky individual but for all of you who wants to end up being success person. So , for every you who want to start looking at as your good habit, you could pick Information Practice in Science and Technology: Evolving Challenges and New Directions become your own personal starter.
