Chirurgie des cancers gynécologiques (French Edition) Denis Querleu, Eric Leblanc, Philippe Morice, Gwenaël Ferron

Les interventions habituelles de traitement initial des stades précoces des cancers gynécologiques impliquent la maîtrise de l'hystérectomie élargie et des curages ganglionnaires par voie abdominale et par voie cœlioscopique. Les situations cliniques rares comme la chirurgie conservatrice des cancers du col utérin ou la chirurgie des cancers de la vulve et du vagin nécessitent de connaître des techniques plus spécifiques. Pour les exentérations pelviennes comme pour la chirurgie des cancers de l'ovaire avancés, la présentation de nouveaux champs que sont la péritonectomie et la splénectomie, mais aussi la chirurgie reconstructrice, impose au gynécologue une formation complémentaire à la chirurgie viscérale.

Cet ouvrage est la synthèse des techniques traditionnelles et des innovations du domaine et propose une 2e édition totalement réactualisée, avec des illustrations nouvelles, ainsi qu'un nouveau chapitre consacré à la chirurgie prophylactique des cancers gynécologiques.

Chaque temps opératoire essentiel est décrit et illustré par des photographies réunies en atlas et complétées parfois par un dessin explicatif (500 images), dans le but d'approcher au plus près la réalité opératoire.

Les auteurs, de renommée nationale et internationale, ont contribué à l'établissement des traitements standards et au développement des techniques nouvelles.

Cet ouvrage sera utile à tous les praticiens chirurgiens, gynécologues, oncologues, en décrivant à la fois les techniques de base très largement utilisables par tous en pratique courante et les techniques d'exception réservées aux hyperspécialistes.
