Limits to Growth: The 30-Year Update Donella H. Meadows

In 1972 four young scientists at MIT wrote *The Limits to Growth*, which shocked the world and became an international best-seller. Using the World3 computer model, the authors looked toward the future, for the first time showing the consequences of unchecked growth on a finite planet. Now, armed with 30 additional years of data, these authors sound the alarm on humanity's devastating effects on climate, water quality, fisheries, forests, and other imperiled resources.
