GIS and Site Design: New Tools for Design Professionals Karen C. Hanna, R. Brian Culpepper

A low-stress introduction to GIS

Forget everything you've been told about geographic information systems. Today's simpler, less expensive, and far more refined GIS software can be operated on a PC or Mac, and in this book you'll discover a new approach to GIS site design and land planning that makes the entire process easier, faster, and more designer friendly.

GIS in Site Design demonstrates how to use GIS the same way you would work with tracing paper and markers. The only difference is that now you'll be meeting your clients' needs to employ GIS data and deliver products in a GIS environment.

The companion CD-ROM contains a tutorial library of all the GIS data in the book. Using techniques explained on the CD to model your own drawings, you'll learn to use GIS for:

- * Landscape architecture, site design, and land planning
- * Visual resource analysis
- * Design of large sites--subdivisions, golf courses, parks, campuses, and more
- * Design of linear systems such as greenways, trails, and riparian restorations

GIS in Site Design is an indispensable resource that will help you master this increasingly important tool and gain access to larger and more challenging site design projects.

From reader reviews:

Marjorie Brown:

Spent a free time and energy to be fun activity to complete! A lot of people spent their down time with their family, or their very own friends. Usually they accomplishing activity like watching television, about to beach, or picnic within the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your personal free time/ holiday? Could possibly be reading a book could be option to fill your cost-free time/ holiday. The first thing that you'll ask may be what kinds of reserve that you should read. If you want to test look for book, may be the book untitled GIS and Site Design: New Tools for Design Professionals can be good book to read. May be it might be best activity to you.

Arthur Atwood:

Do you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Attempt to pick one book that you never know the inside because don't judge book by its include may doesn't work this is difficult job because you are scared that the inside maybe not while fantastic as in the outside appearance likes. Maybe you answer could be GIS and Site Design: New Tools for Design Professionals why because the fantastic cover that make you consider in regards to the content will not disappoint a person. The inside or content is fantastic as the outside or even cover. Your reading 6th sense will directly assist you to pick up this book.

Rod Doughty:

Reading a book for being new life style in this season; every people loves to study a book. When you read a book you can get a large amount of benefit. When you read guides, you can improve your knowledge, mainly because book has a lot of information in it. The information that you will get depend on what types of book that you have read. If you need to get information about your study, you can read education books, but if you want to entertain yourself look for a fiction books, these kinds of us novel, comics, in addition to soon. The GIS and Site Design: New Tools for Design Professionals will give you new experience in studying a book.

Mark Brainerd:

As a pupil exactly feel bored to be able to reading. If their teacher questioned them to go to the library or make summary for some book, they are complained. Just small students that has reading's heart or real their interest. They just do what the professor want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that looking at is not important, boring in addition to can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this era, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this GIS and Site Design: New Tools for Design Professionals can make you really feel more interested to read.
