Life: The Leading Edge of Evolutionary Biology, Genetics, Anthropology, and Environmental Science

John Brockman

The newest addition to John Brockman's Edge.org series explores life itself, bringing together the world's leading biologists, geneticists, and evolutionary theorists—including Richard Dawkins, Edward O. Wilson, J. Craig Venter, and Freeman Dyson.

Scientists' understanding of life is progressing more rapidly than at any point in human history, from the extraordinary decoding of DNA to the controversial emergence of biotechnology. Featuring pioneering biologists, geneticists, physicists, and science writers, *Life* explains just how far we've come—and takes a brilliantly educated guess at where we're heading.

Richard Dawkins and J. Craig Venter compare genes to digital information, and sketch the frontiers of genomic research.

Edward O. Wilson reveals what ants can teach us about building a superorganism—and, in turn, about how cells build an organism. Elsewhere, David Haig reports new findings on how mothers and fathers individually influence the human genome, while Kary Mullis covers cutting edge treatments for dangerous viruses. And there's much more in this fascinating volume.

We may never have all the answers. But the thinkers collected in *Life* are asking questions that will keep us dreaming for generations.

From reader reviews:

Margaret Clayton:

What do you about book? It is not important to you? Or just adding material when you really need something to explain what yours problem? How about your time? Or are you busy individual? If you don't have spare time to accomplish others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? Every person has many questions above. They must answer that question simply because just their can do that. It said that about reserve. Book is familiar on every person. Yes, it is appropriate. Because start from on kindergarten until university need this particular Life: The Leading Edge of Evolutionary Biology, Genetics, Anthropology, and Environmental Science to read.

Lynda Wright:

Information is provisions for people to get better life, information nowadays can get by anyone at everywhere. The information can be a know-how or any news even a problem. What people must be consider when those information which is within the former life are difficult to be find than now could be taking seriously which one is appropriate to believe or which one the actual resource are convinced. If you receive the unstable resource then you have it as your main information you will see huge disadvantage for you. All of those possibilities will not happen with you if you take Life: The Leading Edge of Evolutionary Biology, Genetics, Anthropology, and Environmental Science as the daily resource information.

Bonnie Skelton:

The e-book untitled Life: The Leading Edge of Evolutionary Biology, Genetics, Anthropology, and Environmental Science is the guide that recommended to you to see. You can see the quality of the book content that will be shown to an individual. The language that writer use to explained their way of doing something is easily to understand. The writer was did a lot of research when write the book, and so the information that they share to you personally is absolutely accurate. You also will get the e-book of Life: The Leading Edge of Evolutionary Biology, Genetics, Anthropology, and Environmental Science from the publisher to make you more enjoy free time.

Christopher Riley:

Do you like reading a book? Confuse to looking for your chosen book? Or your book seemed to be rare? Why so many problem for the book? But almost any people feel that they enjoy regarding reading. Some people likes reading, not only science book but in addition novel and Life: The Leading Edge of Evolutionary Biology, Genetics, Anthropology, and Environmental Science or even others sources were given understanding for you. After you know how the truly great a book, you feel wish to read more and more. Science reserve was created for teacher or even students especially. Those guides are helping them to add their knowledge. In other case, beside science reserve, any other book likes Life: The Leading Edge of Evolutionary Biology, Genetics, Anthropology, and Environmental Science to make your spare time a lot

more colorful. Many types of book like this.
