Recherches sur les substances radioactives (French Edition) Marie Curie

Le présent travail a pour but d'exposer les recherches que je poursuis depuis plus de 4 ans sur les substances radioactives. J'ai commencé ces recherches par une étude du rayonnement uranique qui a été découvert par M. Becquerel. Les résultats auxquels ce travail me conduisit parurent ouvrir une voie si intéressante, qu'abandonnant ses travaux en train, M. Curie se joignit à moi, et nous réunîmes nos efforts en vue d'aboutir à l'extraction des substances radioactives nouvelles et de poursuivre leur étude. Dès le début de nos recherches nous avons cru devoir prêter des échantillons des substances découvertes et préparées par nous à quelques physiciens, en premier lieu à M. Becquerel, à qui est due la découverte des rayons uraniques. Nous avons ainsi nous-mêmes facilité les recherches faites par d'autres que nous sur les substances radioactives nouvelles. A la suite de nos premières publications, M. Giesel en Allemagne se mit d'ailleurs aussi à préparer de ces substances et en prêta des échantillons à plusieurs savants allemands. Ensuite ces substances furent mises en vente en France et en Allemagne, et le sujet prenant de plus en plus d'importance donna lieu à un mouvement scientifique, de sorte que de nombreux Mémoires ont paru et paraissent constamment sur les corps radioactifs, principalement à l'étranger. Les résultats des divers travaux français et étrangers sont nécessairement achevés, comme pour tout sujet d'études nouveau et en voie de formation. L'aspect de la question se modifie, pour ainsi dire, de jour en jour.
