Environmental Technology in the Oil Industry

Stefan T. (Ed.) Orszulik

Environmental Technology in the Oil Industry Stefan T. (Ed.) Orszulik

This significantly updated second edition identifies the issues and constraints for each stage in the production of petroleum products – what they are, who is imposing them and why, their technical and financial implications. It then looks in detail at the technological solutions which have been found or are being developed. It also places these developments in their legal and commercial context and looks at the longer term environmental outlook in the light of increasingly sophisticated models in predicting climate change and other consequences of use of petroleum products.
